Selecting Site Associations for Calendar Versions:

Within a protocol, scroll to the Calendar Versions table. You will see a blue Site Associations link above it.

When you create a new calendar, or a new version of a calendar, you will need to choose its site associations. From the main page of your protocol, find the Calendar Versions table.

Check the box(es) to indicate which version(s) of your calendar you wish to associate with a given study site.

Click “Save” when you are done.
