TEAM Training
Syllabus

Methods of Instruction:
- Online, self-paced course with required readings included
- Webinars (3) before the in-person workshop to review training purpose, action planning tools and check-in on progress and troubleshoot. Each webinar will last for one hour and each team member is expected to participate.
- Action Planning Toolkit completed as a team
- 2.5 day in-person workshop in Washington, D.C. (required readings sent before meeting)
- Virtual technical assistance sessions (3) after in-person workshop involving group discussion, reporting out and troubleshooting. Each session will last for one hour and each team member is expected to participate. There will also be three brief homework assignments as part of the technical assistance sessions to foster reflection and discussion.

Workload: Over the course of 15 weeks each participant is expected to spend approximately 50 hours in independent learning which can include the online course, group work and preparing for discussions (in-person or virtual). There will be approximately 30 hours spent in direct instruction.

Attendance/Engaged Participation: There is a relationship between attendance/engaged participation and what you and your team members (thereby your organization) get out of the training. It is expected that each person will actively participate in the entire training and submit all assignments on time. This is critical for everyone’s benefit.

TIMELINE
